

They Tried to Dim us

*They dim the lights with broken schools,
Budgets cut and unfair rules,
With crowded classrooms with little books.
Create lowered dreams along with doubtful
looks.*

*It's not our minds that lack the spark,
It's the systems built in the dark.
Break the cycle, change the scene,
Show the brilliance that is rarely seen.
Give us mentors, help us clear the way,
Funded Schools is one way.*

*The future is what we choose to be,
Invest. Commit. Our Energy.*
